Citation and Scientific Influence of the Works of I.A. Toidze

Iamze Alekseevna Toidze was a Soviet Georgian psychologist associated with the scientific school of Dmitri Uznadze and the development of the theory of psychological set. Her research focused on perception, sensory sensitivity, primary set, and unconscious regulation of human activity. Although only a limited number of her publications are currently preserved and accessible, the works of I.A. Toidze were cited and discussed by researchers in Soviet psychology, psychophysics, cognitive psychology, and studies of perception.

Alexander Grigoryevich Asmolov

The works of I.A. Toidze were mentioned within discussions of the theory of set and unconscious mechanisms of activity developed in the tradition of the Uznadze school.

Alexander Shamilevich Tkhostov

In the book Psychology of Corporeality, Tkhostov included Toidze ' s work in the bibliography of studies devoted to perception and psychological set: " Toidze I.A. Experimental Study of Primary Set. "
